Communal Entrance Doors

Secured by Design

PAS 23/24

Official Police Security Initiative

Communal Entrance Doors

Combining an attractive yet secure main entrance to any building, Security Care's communal entrance doors are able to withstand heavy use and vandalism. The range is suitable for all public buildings, including the front and rear doors on communal accommodation, schools and offices.

- Secured by Design Police Preferred Specification and PAS 23/24 Certification.
- Access Control – heavy duty closers return the door to the closed position and concealed electro-magnetic locks provide automatic locking.
- Electronic opening available.
- Extra Strong Continuous Hinge – means no trapped fingers and improved weight distribution.
- Strengthened Construction – both frame and door are fully welded for added strength, with all welding galvanised to prevent rust.
- Concealed Door Closers – improve appearance and reduce the risk of vandalism.
- Integral Anti Jemmy Strip – protects locking mechanism from attack with crowbars and other levers.
- Vision Panels – available in the door and side panels to enhance appearance and add light to entrance ways.
- Wide Selection of Options and Extras – to customise doors to individual requirements.

SPECIFICATION

Door Leaf

- 1.6mm Zintec Steel (plus 2mm option)
- Folded 45mm thick leaf
- Composite Dufaylite honeycomb core
