

GATES

Corrosion resistant
steel gates

MADE IN
BRITAIN

**STEEL DOORS
FOR THE
REAL WORLD**

**TEN YEAR
GUARANTEE**

GATES are manufactured using Magnelis® sheets and are available with an anti-corrosion warranty of up to 10 years with a standard PPC coating.

**MADE TO
MEASURE**

All steel gates are made to order at our UK factory, are available in a wide range of widths to suit any requirement, and are delivered fully assembled.

GATES

Corrosion resistant steel gates

GATES offer a practical, durable and attractive alternative to traditional timber gates and incorporate many of the benefits of our tried and tested, hard wearing steel door systems to a domestic application.

Gates are an integral part of a property, creating a physical barrier between public and private areas, maintaining privacy and security

> **STRONG AND SECURE**

Our gates are manufactured using Magnelis[®] as the base material. This revolutionary material from ArcelorMittal offers an industry leading level of corrosion resistance, meaning a 10 year life span is easily achievable in most locations with basic maintenance. Finished in a Polyester Powder Coated colour from our standard range, Robust GATES are a practical and cost effective solution, offering a long lifespan and attractive appearance.

> **MADE TO MEASURE**

GATES can be made-to-order to suit opening widths and are offered in a choice of 2 standard heights: 1220mm (4 ft) and 1980mm (6 ft 6").

> **CHOICE OF FINISHES**

GATES are offered either in a flat panel finish for a modern contemporary look, or a more traditional tongue and groove pattern to imitate a traditional timber design.

> **SUPPLIED READY FOR FITTING**

A surface mounted slide bolt is supplied as standard to offer basic security from inside. If the gate is also required to be operated from the outside, a gate latch can be provided. Each gate is supplied with template drilled hinges with dog bolts for additional security.
